

UPDATED PROTOCOL FOR SUMMER, 2021:

IN GENERAL

We will begin using our smaller studio, but we will be limiting class size for both Studio 1 and Studio 2.

Contemporary, Modern, and Tap classes are being reintroduced to our schedule of Ballet and Lyrical classes.

Class size will still be limited and we will continue to practice safe distancing protocols.

If during the session we have an exposure, or anything else happens that would cause us to have to close our physical space again, we will continue teaching the current schedule of classes virtually.

All students/parents are asked to register and make payments online to eliminate unnecessary physical contact.

IN THE STUDIO

Masks are optional for vaccinated students and children ages 3-11. Instructors and assistants of our Mother Goose and Pre-Ballet classes **will** wear a mask during class. Students who are 12 and over and are not vaccinated **MUST** wear a mask.

The waiting room and dressing rooms will continue to be closed, so students should come dressed and ready to dance. Students will leave their belongings in the waiting room and go directly into the studio. There are still spots marked at the barre – each student will be assigned one and students must stay in that spot.

Parents are asked to drop off children at the door, as we are still trying to minimize the number of people in the building. Parents of our Mother Goose and Pre-Ballet students may bring students inside, get them settled and wait inside. Please know that masks must be worn inside at all times if you are not vaccinated. In an effort to minimize the number of people in the building, we ask that parents of older students still wait for their children outside.

When the class moves to center, we will continue to maintain a distance of 3-6 feet between students. The floor is marked with 7'x 8' squares to help maintain safe distance. At the end of each class we will clean/disinfect any common areas such as barres, door knobs, etc. Bathrooms will also be wiped down daily.

Air purifiers with a HEPA filter and UV lights will be used as a part of our daily cleaning/disinfecting regiment.
